

Going Green... It Just Takes a Little Extra Effort

Local recycling and reuse sites provide options for specialized recycling needs

Curbside trash hauling options provide many ways Anderson residents can recycle unneeded or used items such as paper, cans, glass and textiles.

However, those pesky larger items, like televisions, household chemicals, tires and electronics will end up in the landfill if you set them out on trash day...unless you take an extra step.

The good news is Anderson residents can continue to recycle their not-so-common household items by visiting convenient local businesses, or area recycling or reuse drop-offs sites.

The Hamilton County Recycling and Solid Waste District has made your search for these reuse/recycling spots a little easier with a comprehensive drop-off outlet list. This list of items includes the Top 20 items searched for at *HamiltonCountyRecycles.org*. Don't see what you are looking for on this list? Visit the county's recycling website for the complete list of locations and items that can be recycled.
